DETAILED ACTION

Specification

1. The amendment filed 04/22/2010 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "A computer-readable storage medium carrying one or more sequences of one or more instructions which, when executed by one or more processors, cause an apparatus to at least perform the following steps".

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 32-39 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Art Unit: 2618

Regarding claim 32, new subject matter, “A computer-readable storage medium carrying one or more sequences of one or more instructions which, when executed by one or more processors, cause an apparatus to at least perform the following steps”, was not disclosed in the specification, as originally filed. Claims 33-39 are dependent claims and rejected for the same reasoning.

4. This application is in condition for allowance except for the following formal matters:

This application is in condition for allowance except for the 112, first paragraph, rejection (see above). Applicant is given **ONE MONTH or THIRTY DAYS** from the date of this letter, whichever is longer, to correct the formal matter as state above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm’r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Response to Arguments

5. Applicant's arguments filed 04/22/10 have been fully considered but they are not persuasive.

The Applicant’s stated that, “Thus it is at least inherent that the mobile phone and its components have computer readable instructions that may be executed to perform the functions of the mobile phone 200a. Therefore, it is respectfully submitted that the

Art Unit: 2618

feature of amended claim 32 is supported by the specification". In response to the applicant, the examiner can not generalize that the mobile phone has a computer readable medium and that the computer readable medium comprise such instructions as claimed. There is no such disclosure in the specification that "a computer-readable storage medium carrying one or more sequences of one or more instructions".

Therefore the rejection is proper.
